

With memory loss, connection is everything.

We believe that the lives of those with memory loss can be enhanced by *a higher standard of care*.

BrightStar Connections[®] is our dementia care approach that puts your loved one's safety, comfort and well-being first. But we do much more. Whether they're living with early or late-stage dementia, we help them maintain meaningful connections with family, places and activities they love.

Combining expertise with compassion and understanding.

With BrightStar Connections, you'll have a Registered Nurse who uses her memory care training to teach and supervise each member of the team. All caregivers:

- Are fully screened, background-checked, bonded, insured, and have a minimum of one year's experience
- Understand each person is unique and deserves respect for who they were and are
- Know how to keep him or her relaxed and engaged
- Report any signs of change to the nurse and family

Resources, tools and regular meetings help make sure that family members are informed and health care providers are up-to-date.

How BrightStar Connections[®] can provide peace of mind.

- Receive guidance from your BrightStar Care nurse on how to understand and respond to challenges. Have questions? We're here to help 24/7.
- Receive personal, companion or skilled care tailored around your loved one's needs, including help with daily routines and medication management.
- Use our specialized care for just a few hours, to help transition to a new residence or for full 24/7 care.

Our location has been accredited by The Joint Commission—a widely recognized organization that evaluates the nation's best hospitals and other health care systems.
