TRANSITION HOME SERVICES FOR YOUR PATIENTS

Make sure your patients have a safe recovery at home.

When your patient returns home after a medical procedure, hospitalization or a stay in a facility, what happens next can make a big difference in their recovery and lower the likelihood of readmission and other negative outcomes.

While Medicare may cover some of your patients' in-home care, the type of service and frequency can be limited. BrightStar Care[®] is here to provide the supplemental or continued care they may need or want.

A BrightStar Care nurse is part of the team.

Our nurse will coordinate with you or a Medicare home health agency to create a plan of care for the days or weeks ahead. He or she will supervise our caregivers to ensure the plan is followed and that you or other providers who choose to remain involved are kept up-to-date.

Supervised transportation for comfort and peace of mind.

We'll transport your patient safely and comfortably from your hospital or facility to their home, stopping at the pharmacy if needed. Plus, we can schedule and make sure your patient gets to and from their follow-up appointments.

In-home care to help them recover.

Whether your patient needs 24/7 care or just a few hours a week, we're always here to help.

Examples of skilled nursing care:

- Medication setup and administration
- Wound care
- G-Tube feedings
- Infusion therapy

Examples of personal or companion care:

- Getting settled at home
- Medication reminders
- Help with bathing, dressing, grooming and toileting
- Light housekeeping and meal prep
