

Company Overview

Transportation On Demand helps facilities and individuals keep their appointments by providing non-emergency transportation to doctors' visits, treatment facilities, rehabilitation centers, and more. Our vehicles are modern, accessible, and can be equipped with a non-medical stretcher, making the whole process as easy and comfortable for our clients as possible.

We understand that many nursing homes, adult day care facilities, doctors' offices, and other patient facilities don't have the vehicles or staff available to provide ambulatory, wheelchair or stretcher services at their locations. Transportation on Demand can help by providing vehicles and staff for transporting patients.

We are your one-stop provider for facility and individual transportation needs.
